

AirTurn BT-105 BlueTooth Wireless Page Turner

The AirTurn BT-105 is perfect for musicians who need to keep both hands on their instrument while using apps for reading sheet music and guitar tabs. The BT-105 is super compact and can connect to one or two foot switches. A simple tap on the right foot switch will turn pages forwards, and a tap on the left foot switch will turn pages backwards.

In addition to turning pages for musicians, there are many other uses for the BT-105 from assistive technology to teleprompting.

Features

The AirTurn BT-105 features a power switch, status indicator light, two 3.5mm jacks and an internal rechargeable battery with a mini USB recharging port. Battery life will vary, but users can expect up to 100 hours of standby usage. The BT-105 also features automatic Bluetooth pairing with the iPad for easy connections and fast page turns, as well as a built-in debounce filter to prevent multiple page turns for each foot switch press.

The BT-105 works with a growing number of iPad apps, including forScore, MusicReader, and unrealBook. It can also be configured to work with programs running on Bluetooth-equipped Mac and PC computers that can accept Page Down and Page Up keyboard commands, such as Adobe Acrobat, Microsoft Word, PowerPoint, Keynote, and most other document and presentation programs.

More and more musicians are discovering the ease and convenience of being able to carry their entire sheet music collections in digital music reading devices like the iPad and forgoing the bulk of paper scores. The BT-105 finally makes the iPad a practical sheet music reading tool for musicians who need to keep their hands on their instruments and their focus on the music.

AirTurn, Inc., a Boulder, Colorado based company, creates and markets technologies to enhance the study, practice and performance of music.

AirTurn BT-105 Specifications

Includes

- On/Off/Reset Switch
- Status indicator for communications and charging
- 2 - 3.5mm (1/8") audio stereo jacks*
- Mini USB port for charging
- Internal 3.7v 380mAh lithium polymer battery
- 1 meter USB charging cable
- Multiple profiles for different uses.
- Manual

* Each jack may have a stereo-mono splitter inserted to make 4 ports. Application software must support the additional ports to function.

Bluetooth

- Fully qualified Bluetooth 2.1/2.0/1.2/1.1 module
- Bluetooth v2.0+EDR support
- Low power modes (26uA deep sleep, <3mA connected in sniff mode, 30mA TX)
- Certifications: FCC, CE
- Environmentally-friendly, RoHS compliant.

Approximate Range

After One Wall 60 feet

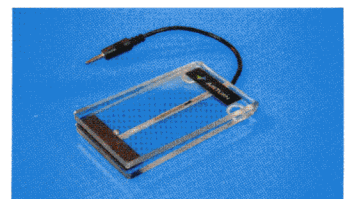

After Two Walls 55 feet

After Three Walls 36 feet

Operates with Bluetooth equipped PC's MACs, iPad and most Bluetooth computers that support Bluetooth keyboards.

Foot Switches

The BT-105 will function with most normally open (NO) momentary switches. A built in debounce feature filters out switch noise from most switches. AirTurn provides the BOSS FS-5 and it's own ATFS-1 for truly silent operation.
